INFORMATION AND COMMUNICATION TECHNOLOGIES

DAVANTIS

Davantis designs intelligent security and video surveillance software for companies and institutions. The system automatically alerts clients whenever a critical situation occurs. This enables ensuring full control and constant prevention of risk situations that could endanger the future of the company or its assets.

<http://www.davantis.com/>

HEALTH & SPORT LAB

Health&Sportlab is a technology-based emerging company that provides with practical, comfortable, non-invasive tools through mobile devices. The company is a spin-off held by Universitat Autònoma de Barcelona (UAB) and Universitat Politècnica de Catalunya (UPC).

<http://healthsportlab.com/>

MASS FACTORY

Mass Factory is a technology based company that emerged from the School of Engineering at the Autonomous University of Barcelona. Develop mobile applications for urban accessibility and mobility. OnTheBus is the first product aimed at people with disabilities.

<http://www.appandtown.com/>

ZETES

Since its creation in 1984, Zetes has been at the forefront of innovation in both supply chain optimization and people authentication.

<http://www.zetes.es/>

BIOMEDICINE AND BIOTECHNOLOGY

ANTIBODYBCN

AntibodyBcn is a company dealing in the sale of antibodies and other reagents for research in Biomedicine and Biotechnology. It was created by a team of researchers to make it easier for research laboratories to obtain reagents and manage purchases.

<http://www.antibodybcn.com/>

BCNINNOVA

BcnInnova develops, manufactures and commercializes new "diagnosis support devices" that measures the Ocular Motility using computer vision technologies and other engineering disciplines.

<http://www.bcninnova.com/>

CIMAB

Centre d'Infertilitat Masculina i Anàlisi de Barcelona S.L (CIMAB - Centre for masculine infertility and analysis of Barcelona) determines the fertility potential of the patient in a much more precise way based on different methods of sperm analysis.

<http://www.cimab.es/>

DEVICARE

Devicare's activity focuses on developing innovative solutions for monitoring, prognosis, diagnosis and treatment of chronic diseases, especially those that can be controlled from the patient's home.

<http://devicare.com/>

PRAGMATIC DIAGNOSTICS

Pragmatic Diagnostics is a company located in the Eureka building of the UAB Research Park. It is focused on the research and development of new products for in vitro diagnostics.

<http://pragmaticdiagnostics.com/>

ZIP SOLUTIONS

Zip Solutions is a company located in the Research Module B of the UAB Research Park. The company develops technologies for the production of recombinant proteins and peptides both therapeutic and industrial interest.

<http://www.zipsolutions.es>

MATERIAL SCIENCE AND ENERGY

AEINNOVA

AEInnova is a company incorporated in late 2014 aimed at research, innovation and development of new alternative energy related products.

<http://www.aeinnova.com/>

AFFINITICA

Afinitica is a company with a dedicated focus on instant adhesives, sealants and coatings; with the intention of promoting their use thanks to our unique, novel cyanoacrylates. It was born in 2013 as a spin-off company of the multinational Henkel.

<http://www.afinitica.com/>

ALIBAVA SYSTEMS

Alibava Systems develops a simple, but complete, electronic system that precisely and easily measures radiation detectors and markets it on an international level. It is implemented as a compact independent system that is connected to a PC by a USB cable and includes control software.

<http://www.alibavasystems.com/>

CUANTUM MEDICAL COSMETICS

Quantum is a company engaged in the development, manufacture and marketing of high quality cyanoacrylate adhesives. They offer efficient solutions that help fast and simple suturing and closing wounds and lacerations of the skin and improve many of the techniques used in beauty treatments.

<http://www.cuantum.me/>

FUTURESENS

FutureSiSens is a EBT company of the Autonomous University of Barcelona, the Institute of Microelectronics of Barcelona (IMB CNM - CSIC) and the Polytechnic University of Catalonia dedicated to the development of a nanotechnology-based thermoelectric silicon sensor, able of self-sufficient for energy and detect breathing problems such as sleep apnea or pneumonia.

<http://futuresisens.com/>

NANOMOL

Nanomol Technologies is a science and innovation driven company providing cutting edge solutions to process, structure and characterize, at micro and nanoscale, active molecules of pharma, biotech and cosmetic companies.

<http://www.nanomol-tech.com/>

HENKEL

The Henkel R&D and Advanced Technologies Laboratory is a research centre dedicated to the development of advanced materials for adhesives and surface treatments. It occupied 240 square meters of floor space in the Eureka Building and is set up as a multidisciplinary installation that carries out research in the fields of chemistry, material science and the development and testing of new adhesives.

<http://www.henkel.es>

OXOLUTIA

Technology-based company with the objective marketing processes and materials developed in the field of superconductivity applied to nanotechnology. Its main technology is based on obtaining thin functional layers for chemical applications.

<http://www.oxolutia.com/>

FOOD SCIENCE AND ANIMAL HEALTH

VETGENOMICS

Vetgenomics is a technology-based company specialized in veterinary genetic diagnosis.

<http://www.vetgenomics.com>

LUCTA

Lucta is a Spanish company, founded in Barcelona in 1949, engaged in the manufacture of fragrances, flavours and animal feed additives. The company has installed in the Eureka building an innovation unit of ingredients and technology, which develops studies on new complex ingredients for food and/or animal, as well as studies of different formulations and encapsulation technologies to protect or liberate aromas and fragrances.

<http://www.lucta.com/>

ENVIRONMENTAL SCIENCES AND SUSTAINABILITY

AERIS

Aeris is a spin-off dedicated to design, construction and maintenance of bio-reactors for the treatment of waste water and gases.

<http://www.aeristec.com/>

CTRL4ENVIRO

Ctrl4Enviro is a company dedicated to research into advanced solutions in control and monitoring systems (sensors and actuators) for environmental processes (e.g. water treatment, air control, etc).

<http://ctrl4enviro.com/>

ODOURNET

Odournet is an international group of odour research and air quality consultants that develops, manages and delivers top level expertise to assist industry and government authorities to diagnose and solve environmental odour nuisance related problems, and evaluate consumer products and materials to support product development, consumer trials and proof of claim.

<http://www.odournet.com/barcelona.html>
