

## PhD in Environmental Sciences

---

### General information

---

**The doctoral studies in Environmental Sciences, together with the previous academic training programme, the official Master in Environmental Sciences, make up the PhD in Environmental Sciences.**

In addition to the information on this page, you may learn more by visiting the site of the official Master's degree, where you will find general and specific objectives of each course, the course structure and names of courses, their content, the number of credits and other information that may be of interest (name of the coordinator, contact information, administrative staff, etc.).

Application for admission to this PhD programme may be submitted for consideration of the Studies Committee by candidates who have earned 60 ECTS credits in one or several official Master programmes compatible with this PhD.

You will also find information about paperwork and administrative procedures on the left-hand menu and the FAQ's on the right.

**This programme is fully adapted to the new European Area of Higher Education (EAHE) and makes it possible to earn the official PhD from the UAB.**

### Academic Activities

---

Degree	PhD in Environmental Sciences
Type of course	Official

---

### Scheduled academic activities

Exceptionally, and depending on previous background, it may be advisable for the PhD applicant to take up to 30 additional credits, including, if necessary, the research credits, to complete his or her training.

No specific curriculum is established for this PhD. Each dissertation director/advisor will determine the activities the student should carry out while preparing the dissertation.

Schedule of a regular seminar for research presentation and discussion.

Progress report

Yearly progress of the PhD student activities is reported through an oral presentation on the status of the work completed to be evaluated by a committee of three doctors appointed by the PhD Studies Committee.

Assessment methodology and conditions are specific to each program. Please check the [criteria](#) for this particular PhD program.

Based on progress reported, the PhD Studies Committee might recommend the student's dismissal from the programme to the Graduate Studies Subcommittee.
