
OPEN CALL FOR TORRES QUEVEDO CANDIDATES

Pragmatic Diagnostics, an *In Vitro* Diagnostics (IVD) company located in the Autonomous University of Barcelona (UAB) Campus, is looking for highly motivated PhDs willing to apply for a Torres Quevedo fellowship from the “Ministerio de Economía y Competitividad”.

The company has expertise in developing novel IVD reagents and technologies, either for its own purposes or for third parties as a service (established companies, spin-offs or start-ups). Despite its youth, the company benefits from the years of international experience in the R&D field of IVD of its Founder and CEO. PDX is currently involved in the development of an innovative new immunochemistry technique with broad market potential, in which the selected candidate will be involved. The successful candidate will be responsible for planning and executing the experimental tasks, as well as data processing and analysis.

The ideal candidate should hold a PhD in Chemistry/Pharmacy/Biochemistry or a related subject. A previous “Juan de la Cierva” or a “Ramón y Cajal” fellowship would be a plus. Previous experience in Immunoassays, bioconjugation and/or synthesis of nanoparticles, as well as in colloidal systems from a physic-chemistry perspective, would be desired. An excellent command in English, good organizational and planning skills are also required.

All applications must attach a CV and a motivation letter and be submitted to the following email address jobs@pragmaticdiagnostics.com. Please include as email subject the reference “Torres Quevedo Fellowship”.

The deadline of the applications will be March 11th 2015.
