

Aslogic

Aslogic is a startup company specialized in the development of Decision Support Systems.

Its solutions are based on its strong background in meta-heuristics, machine learning techniques, and optimization to get the maximum performance in complex scenarios.

● Technologies

U-space: framework for managing unmanned air traffic. Aslogic supports the creation of dense, efficient and safe complex airspaces.

Surgery room management: based on the optimization of the different workflows, machine learning techniques to reduce demand uncertainty, and optimization algorithms to create optimal operating room scheduling increasing its throughput.
