## 10. ENTREPRENEURSHIP AND INNOVATION

To encourage entrepreneurship the professor provides students with the necessary tools to analyze the potential applications to be worked on new business ventures in the tourism industry. The classroom

activities and the teamwork consolidate the relationship between people who need to provide synergies to achieve the agreed team objectives and then turned into future business projects.

The course provides the student with nowadays and real vision thanks to the studies and researches that must be done in the scheduled activities. Furthermore, the evaluation system has self-assessment and community evaluation as a complement to the professor assessment to engage students and let them know the level reached by the group to train them in the reflection techniques before appropriate approaches or unsatisfactory ones for the success of a business project, whether individual or group.

All works and student's contributions are shared with the rest of classmates to share the created resources and to ensure the creation of authentic information.
