

Moez Ayadi

Why did you decide to do a PhD project in our Department?

I decided to do a PhD in your department because it offers the opportunity to conduct practical in-field research supported by a sound theoretical supervision which helped me overcome all the difficulties that faced me during my journey.

What did you like the most of your academic experience?

What I liked about my academic experience was the work atmosphere and the human relationships with the department staff as well as the combination between the theoretical and practical supervision offered by a very professional team.

What is your advice to potential students?

I advise potential students to go for PhD in your department for the above stated reason, i.e. the work atmosphere, the opportunity to carry out field work, and the humane relationships with the department members.
