

**THESIS PROJECT (1500 – 2000 words)**

- **Name of doctoral student and director proposed**
  
- **Title** (The title should contain the idea / main keywords that structure the research project. It is understood that a subject provisional title to change as the investigation develops)
  
- **Background** (Indicate the main theoretical references and other studies that serve as a starting point for the research proposed. Briefly discuss the research done so far and indicate their contributions and weaknesses)
  
- **Objectives / hypothesis** (State concisely the main objective of the research project. It is convenient to structure this overall objective in a number of specific objectives or hypotheses with the main research questions are indicated. The objectives / hypotheses have to be as specific and concrete possible)
  
- **Methodology** (explain in much detail as possible methodological instruments to be used in the development of research. Justifying its use and suitability to meet the objectives / hypotheses proposed in the research)
  
- **Expected results** (Indicate the main expected results obtained from research. Indicate, where applicable, its applicability to inform policies or specific actions)
  
- **References** (Provide a list of the main references on the subject of study. The list should not be exhaustive but should provide a starting point as complete as possible on the investigation so far)
  
- **Means** (Indicate the materials that are available to carry out this research project means. Indicate if available scholarship or have its own means. Also indicate the type of doctoral -a full-time or part-time continue -)
  
- **Temporary planning.** Timeline (3 years if full-time or 5 years part-time (temporarily indicate the sequencing of activities undertaken in the course of the investigation).
