

Research topic: LCA of diets of breastfeeding mothers

Research line: agrifood & environment & nutrition

Research group: Environmental Engineering

*CONTACT: carles@ineditinnova.com*

Dr. Carles Gasol (DEQBA-UAB)  
Dra. Edilene Pereira (inèdit)  
Student selected: Elisa Pérez

**Main aim: To calculate the environmental impacts of diets of mothers, that breastfeed (breast and bottle) at 40 days after the birth of the baby and after 6 months of birth**

#### FASE I

- To evaluate and compare the diets.
- To compare potential different functional units and respective results
- To assess detailed information such as time of cooking, source of energy, where they do grocery etc, in order to draw an environmental profile
