Prerequisites

Although there is no official prerequisite, students are advised to review the concepts that refer to the microbial world, studied previously.

Objectives and Contextualisation

In this subject it is intended that the student:

- Know the concepts on which the epidemiological studies of infectious diseases in humans are based.
- Know the microbiological techniques applicable to epidemiological studies.
- Know what is the situation of the most infectious diseases that concern the global level.
- Understand the measures we have in place to prevent the transmission of infectious diseases.
- Know the epidemiological surveillance systems.
- Know how to extract and correctly interpret the information regarding the epidemiology of infectious diseases in humans from specialized sources.

Content

CONTENTS OF THEORETICAL CLASSES

Topic 5. Immunization.

CONTENT OF THE SEMINARS

Attendance at all seminars is mandatory. In the seminars, students will prepare epidemiological reports on infectious diseases using data from national and international epidemiology agencies.
