

Degree-Final Project

Code: 102635
ECTS Credits: 6

Degree	Type	Year	Semester
2502445 Veterinary Medicine	OB	5	0

Contact

Name: Maria Lourdes Abarca Salat
Email: Lourdes.Abarca@uab.cat

Use of Languages

Principal working language: catalan (cat)
Some groups entirely in English: No
Some groups entirely in Catalan: Yes
Some groups entirely in Spanish: No

Prerequisites

The requirements to attend this subject are marked by the UAB Regulations. Students must have passed 210 ECTS credits. It is a requirement to have passed the entire 1st academic year and it is also recommended to have passed the 2nd year of the degree.

Objectives and Contextualisation

This is a compulsory subject of the last year of the degree. The main objective is to work the transversal competences of the degree in an integrated way.

The student must defend a work about veterinary topics. The final degree project will be supervised by a tutor (professor of Veterinary's degree) who will advise and help with possible doubts and will evaluate the process. Once the work has finished, it must be defended in front of a TFG Assessment Commission (CATFG).

Competences

- Analyse, synthesise and resolve problems and make decisions.
- Apply scientific method to professional practice, including medicine
- Comunicar la informació obtinguda durant l'exercici professional de manera fluïda, oralment i per escrit, amb altres col·legues, autoritats i la societat en general.
- Demonstrate in depth knowledge of any specific aspect of any one of the fields of veterinary science.
- Demonstrate knowledge of English to communicate both orally and in writing in academic and professional contexts.
- Draft and present satisfactory professional reports, always maintaining the required confidentiality.
- Seek and manage information related with professional activity

Learning Outcomes

1. Analyse, synthesise and resolve problems and make decisions.
2. Apply scientific method to professional practice, including medicine
3. Communicate information obtained during professional exercise in a fluid manner, orally and in writing, with other colleagues, authorities and society in general.
4. Demonstrate knowledge of English to communicate both orally and in writing in academic and professional contexts.

5. Draft and present satisfactory professional reports, always maintaining the required confidentiality.
6. Expose the knowledge and skills acquired in any of the fields of veterinary science.
7. Interpret data relative to any of the fields of veterinary science.
8. Resolve problems in any of the main fields of veterinary science.
9. Seek and manage information related with professional activity

Content

The TFG will be carried out by the student, independently and individually, under the supervision of a tutor. The TFG is related to any of the subjects in the veterinary field. Its content is based on the topic offer, renewed annually.

Three types of TFG are possible:

a) Bibliographical review: Summary and state of the art of a topic on any of the areas of knowledge of the degree. It will include the following sections:

- Title and author
- Objective (s) and presentation of the topic with the most relevant results
- Conclusions
- Bibliography

b) Experimental work: Research project on a topic related to one of the areas of knowledge of the degree. It will include the following sections:

- Title and author
- Introduction
- Objectives
- Materials and methods
- Results and discussion
- Conclusions
- Bibliography

c) Informative work: Dissemination of a scientific topic of social interest aimed at the general public or students of non-university education levels. It will have to use a comprehensive scientific language and include the following sections:

- Title and author
- Objective (s) and presentation of the topic

- Social, educational or informative interest
- Bibliography

The list of topics will be drawn up based on the proposals made by the teachers of the degree. Once approved by the commission for the TFG, the Faculty will make them public at the end of July through its website, along with the information on the application process.

The first application period for assigning topics will be in September, and the second in February. The application will be made online through the page sia.uab.cat where each registered student will record their preferences (maximum 5).

The professor in charge of the subject will assign the requested topics and the corresponding tutors taking into account the order of preferences of each student and using as a criterion, in case of conflicts, the academic record and the number of ECTS passed. Once the process has been completed, the list of assignments will be published on the Faculty website at the end of September and during the month of February (2nd period).

There is also possible that a student proposes a topic to a specific teacher. If he/she accepts it, he/she must make the proposal to the professor in charge of the subject who will inform to the commission for the TFG. If it is finally accepted, it will be assigned directly to the student who made the proposal.

Methodology

The TFG methodology include sessions of supervision, autonomous work and evaluation activities.

The person in charge of the subject will hold an informative session with all the students. A session on documentary tools to write a final degree project will be also scheduled during the first semester

The tutor will keep four meetings with the student:

- Preliminar meeting: Once the student has the assigned topic, he will request a meeting with the tutor in order to define objectives, methodology, bibliography, meeting schedule etc.
- Two follow-up meetings (initial meeting and progress meeting), to discuss the progress of work's student.
- A final meeting in which the tutor will give the latest indications for the presentation of the TFG.

In the three kinds of TFG, the material to be evaluated is:

1- Written report: Include all the sections, in addition to the tables and / or figures. It is not necessary to print it. The extension will be 3000 -4000 words (15 pages maximum) including tables, figures and bibliography. It will be evaluated by the tutor and the CATFG.

2- All the material which allows the tutor to evaluate student's work during the tutorials.

3- Poster in English: It will be evaluated by CATFG. The dimensions and type of printing required to make the presentation will be specified in advance. It will not be necessary to print it and it will be displayed on the screen in pdf format.

The dates of deposit of the documents and defense of the TFG will be published on the Faculty website.

Activities

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Informative session	1	0.04	
Session on documentary tools to write a Final degree project	2	0.08	9
Type: Supervised			
Tutorials	7.5	0.3	1, 2, 9, 6, 7, 8
Type: Autonomous			
Final degree project writing	37	1.48	1, 2, 9, 3, 4, 6, 7, 5, 8
Information elaboration and development of the project	52	2.08	1, 2, 9, 3, 4, 6, 7, 5, 8
Information search and/or practical activity	50	2	1, 2, 9, 4, 6, 7, 8

Assessment

The final grade depends on the evaluation made by the tutor (50% of the final grade) and by the CATFG (the remaining 50%).

The tutors will have a follow-up guide and an evaluation form that will contain guidelines on indicators to evaluate, number of follow-up actions, evaluation of intermediate documents and its updating, final report evaluation or others, in order to obtain an evaluation as clear and homogeneous as possible.

After each meeting, the tutor will have to complete the corresponding evaluation form. In the final grade of the tutor (50% of the final grade), the initial meeting will worth 10%, progress meeting 25% and final meeting, 25% of the final grade. The remaining 40% will be given by the evaluation made by the tutor of the final report deposited. Attendance to the seminar on documentary tools to develop the TFG will be included in the evaluation form of the initial meeting. The transversal competences assessed by the tutor will be: CT1, CT4, CT5, CT6, CT7 and CT8.

On the day of TFG's defense, the poster will be screened. The student will make a brief oral presentation of the topic (maximum 5 minutes) and answer the questions asked by the members of the TFG Assessment Commission. Each member of the TFG Assessment Commission will evaluate the written work (30% weight), the poster in English (30% weight), the oral presentation (10% weight) and the defense of the work (weight of 30 %). The final grade of the committee will be the average of the individual assessments of its members. The evaluation of the commission will worth 50% of the final grade. The transversal competences evaluated by the CATFG will be: CT1, CT4, CT5, CT6, CT7 and CT8.

Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Assesment of Final report and Poster	30%	0	0	1, 2, 9, 3, 4, 6, 7, 5, 8
Oral presentation and defense	20%	0.5	0.02	1, 2, 3, 6, 7, 8
Tutorials and assesment of documents	50%	0	0	1, 2, 9, 3, 4, 6, 7, 5, 8
