- Psychopedagogical orientations to students with lack of care and students with ADHD and ASD
- Psychopedagogical orientations on health prevention
- Psychopedagogical orientations to personal and family problems
- Orientations for students with sensory and motor needs
- Prevention of coexistence problems in Secondary Education: assessment, characteristic processes and specific resources

Methodology

The methodology is student-centered in order to have a meaningful, functional and contextualized learning process. To do so, different methodological strategies are used, such as classroom practices, case studies, role-plays or debates among others. These strategies combine the theoretical foundation together with its practical implementation, and they are carried out by experts that combine their lecturing role at the university with career guidance practice in educational centers.

Assessment

The assessment is carried out formative and summative. The formative evaluation allows to monitor the evolution of the teaching-learning process and, summative evaluation, allows to verify the learned learning and the skills developed through theoretical-practical evaluation activities with a cross-sectional approach.
Individual and group assessment activities are combined to evaluate the individual knowledge, abilities of analysis, reflection and application, together with the capacities of teamwork.

To overcome the blog it is essential to take at least 5 in each one of the activities proposed. The activities must be delivered on date and format indicated. In the case of having some practice suspended, there is a single possibility of recovery in which, it will be necessary to re-submit the modified practice, incorporating the comments made by the teaching staff. It will be necessary to make the delivery within a maximum of 10 days after the publication / information of the notes. Recovery activities may opt for a maximum of 5.

Individual situations that do not conform to the approach described, will have to communicate in writing to the teaching staff involved that will assess if it is possible to enable some adaptation, without losing sight of the philosophy of the evaluation of the block.

The evaluation activities will be the following:

1. Classroom practices. To calculate the note in this block will be the average of all the classroom practices performed with all the teaching staff.

   It has a weight of 40% of the final grade.

   Both individual and group practices will be carried out.

2. Individual work of analysis of reality. The teaching staff will offer 5 topics to do the work. The thematic will be distributed in the classroom, in such a way that the number of students by subject is balanced.

   It has a weight of 30% of the final grade.

   Delivery date: February 24, 2020.

3. Individual case study. A case will be considered in which the student will have to design the intervention, arguing the reasons for the choice and its suitability.

   It has a weight of 30% of the final grade.

   Delivery date: May 2020.

Throughout the module, other learning activities may be requested, unless they have to be considered as evaluation tasks, whether they are compulsory or classroom development.

Job submissions will be made primarily through the virtual campus. Other channels of delivery may be enabled, prior agreement with the teaching staff, informed via the classroom and via the virtual campus. Work will not be accepted by means of tracks not agreed with the teacher, nor works delivered with incorrect formats, which do not include the name of the authors or are submitted out of time.

The work notes and exams will be uploaded no later than 1 month after delivery.

According to the UAB regulations, plagiarism or copying of any work will be penalized with a 0 as a note of this work, losing the possibility of recovering it, whether it is an individual or group work (in this case, all members of the group will have a 0). If during the realization of an individual work in class, the teacher considers that a student is trying to copy or discovered any type of document or device not authorized by the teaching staff, the same will be described with a 0, without a recovery option.

Class attendance is mandatory: the student must attend a minimum of 80% of classes, otherwise it will be considered "not presented"
